

🔒 DES Configuration Overview

Current encryption setup and parameters for DES/3-DES operations:

Current Message:	00010100 11010111 01001001 00010010 01111100 10011110 00011011 1000001
Key Part A:	3b3898371520f75e
Key Part B:	922fb510c71f436e

Part I: Key Configuration

🔑 DES Key Setup:

Configure the message and encryption keys for DES and Triple DES operations. Each key must be exactly 16 hexadecimal digits.

Message:	00010100 11010111 01001001 00010010 01111100 10011110 00011011 1000001	Change plaintext
Key Part A:	3b3898371520f75e	Change Key A
Key Part B:	922fb510c71f436e	Change Key B

Part II: Encryption/Decryption Operations

🔒 Interactive Encryption:

Enter your own plaintext and key to perform DES encryption and decryption operations. Choose between ASCII text input or hexadecimal format.

Input Type:	ASCII (8 characters) ▼
Plaintext:	ASEASDWQ
Key:	01928374756ABCDE
DES Encrypt DES Decrypt	
Output:	00010100 10000101 01101101 11101010 11001101 00000110 10110010 10010011
TDES Output:	01110111 11000001 01101010 00000010 10100010 10110001 00100110 00010101
	Show TDES Output

Part III: Answer Verification

📄 Verify Your Understanding:

Based on the encryption results from the previous parts, enter your answer to verify your understanding of the DES encryption process.

Your Answer:	0111011111000001011010100000001010100010101100010010011000010101	Check Answer!	Reveal Answer
